

DT 11

CATALOGUE 2023/24

THE **N°1** CHOICE
OF CHAMPIONS

DT11 SERIES

“

Nathan Hales

I started using my DT11 in 2020 and straight away my scores and consistency improved dramatically.

Since I've had it I've achieved both a 124/125 and 197/200! I'm very proud of both those results. But my silver medal at the World Championships... doesn't get much better!

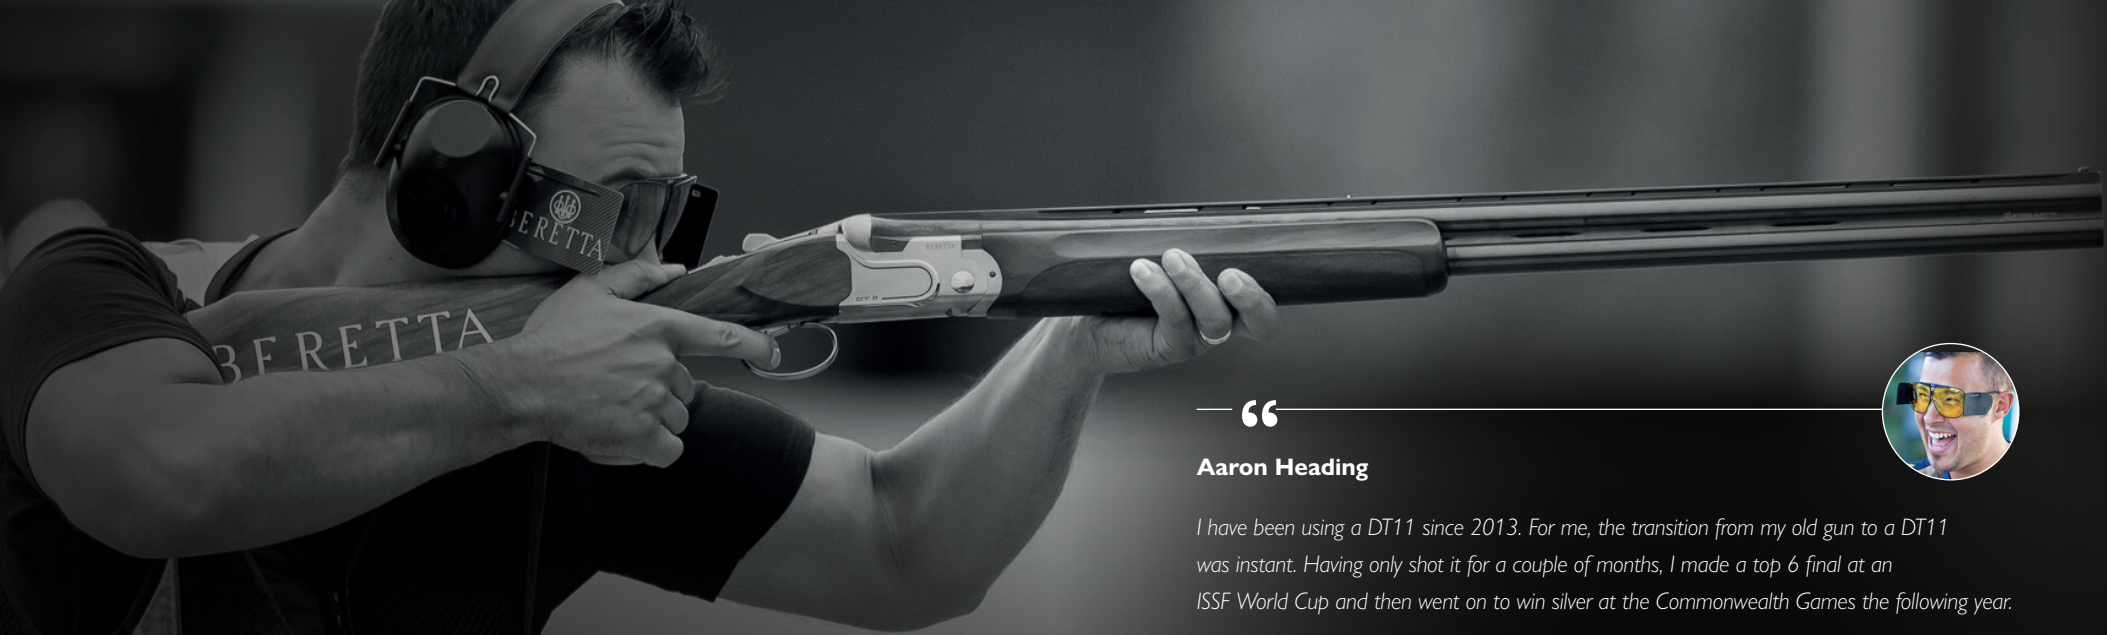

I love the way this gun handles, the way it patterns and the way it breaks targets!

”

THE CHAMPION'S CHOICE

In most sports, shooting in particular, winning an Olympic medal is the pinnacle of a career. Those who achieve this and stand on the Olympic podium will have dedicated many years of practice to refine and develop their natural talent. The ability to deliver their peak performance within the Olympic theatre and cope with the intense pressure is impressive. For shooters at this level, the choice of gun is vital. Beretta has an unparalleled record of winning Olympic medals, since their first success at the 1956 Melbourne Olympics. The DT11 has, in recent Olympics Games, won more medals than any other gun. It was used to win 10 medals in Rio and 9 in Tokyo.

“

Aaron Heading

I have been using a DT11 since 2013. For me, the transition from my old gun to a DT11 was instant. Having only shot it for a couple of months, I made a top 6 final at an ISSF World Cup and then went on to win silver at the Commonwealth Games the following year.

”

TECHNICAL ADVANTAGE

The Beretta DT11 is the No. 1 choice for serious shooting athletes across all clay disciplines. This pedigree is hard earned and here are some of the reasons for its success:

SOLID ACTION

Practice makes perfect as the saying goes; this means true competition guns need to withstand extraordinary levels of use. At the core of the DT11 is an incredibly solid steel receiver, CNC machined from a solid block of specially formulated steel. This action is wider and heavier than other Beretta models not only for added strength but also to put more weight between the hands.

TRIGGER PULLS

An Olympic level shooter is focussing eyes and mind on the rapidly moving target, pulling the trigger occurs instinctively at the right moment. If this level of athlete is even aware of the trigger pull there is something wrong. The DT11 trigger pulls are crisp, consistent and entirely predictable.

The secret to this level of mechanical excellence is a combination of design and gunmaking skill. The DT11 has a much lighter trigger pull in comparison to guns with a conventional coil mainspring. This is owing to the DT11's V mainspring which creates a stronger connection between the sear arm and the hammer.

REMOVABLE TRIGGER UNIT

DT actually stands for drop (detachable) trigger. In the unlikely event of a mechanical failure, the top shooter needs the opportunity to replace the trigger unit. This is easily done with the DT11 allowing an easy repair. Most of all this feature is for peace of mind and unlikely ever to be needed.

CROSS BOLT LOCKING MECHANISM

Another distinctive feature of the DT11 is the bolt that emerges from the left-hand side of the action shoulder when open. The cross-bolt system is simply the strongest and most durable way to create a lock up between barrel and action, essential for guns that will be firing high volumes of shells year after year. Eventually the cross bolt can wear but it can be replaced to further boost the life of the gun.

BARRELS

Not all steel is the same. Beretta have developed a unique tri-alloy steel with elements of Nickel, Chromium and Molybdenum which gives the maximum tensile strength. Beretta's barrels start their process as a short solid piece of steel which is deep drilled. Through the cold hammer forging process this piece of metal is beaten and shaped into a barrel. Cold hammering, whilst strengthening the metal, also stresses it and makes it brittle. To counteract this Beretta perform a stress relief of the material by heating the tubes to 600 °C in a close to vacuum environment, thereby avoiding chemical reactions that can take place at this extreme temperature.

This process also allows Beretta to apply the finishing touches to the internal geometry of the barrel, mill the choke housing and prepare the tubes for fitting into the monoblock.

Given the wide action of the DT11, and in order to create a seamless transition from the barrel to the action, the monoblock is elegantly flared; a characteristic that the DT11 shares with more illustrious SO models. A further detail that improves the life of the DT11 are the trapezoidal barrel shoulders which allow for perfect barrel alignment, eliminating movement and solidly sealing the barrel and action.

RIB

The DT11 has an extremely elegant two-tier rib with the base seamlessly aligned to the top of the barrel. The file cut upper surface is anti-reflective and air flows freely through the vents to dissipate heat.

CHOKES

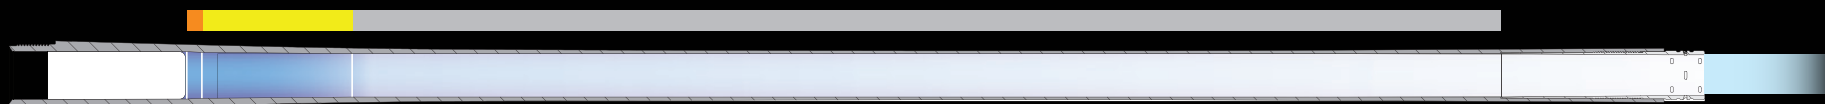

Manufactured from high-strength steel, Beretta Optimachoke HP chokes provide unmatched resistance to corrosion and the power of steel shot.

Optimachoke HP chokes are provided in an internal or extended version and can be found in different configurations according to the discipline.

DOUBLE CONE about 80mm*

CYLINDER SECTION

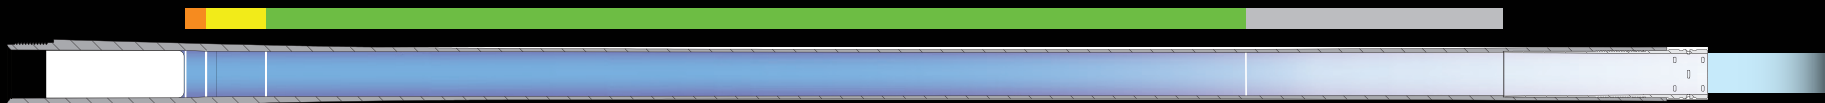

STEELIUM

BERETTA DT11 SPORT 31"

The Steelium barrel configuration ensures smooth recoil and excellent performance with every type of competition and game cartridge. The 80mm double forcing cone tapers into the long cylindrical section before eventually blending into the choke.

TRIPLE CONE about 450mm*

CYLINDER SECTION

STEELIUM PRO

DT11 TRAP, SKEET, SPORT

In Steelium Pro barrels, the length of the forcing cone is further extended, up to 450 mm (in 76 cm barrels). An essential ally for those who want to compete at the highest level: it is no coincidence that Steelium Pro barrels are essential components of the most successful shooting platform ever, the DT11.

* Indicated lengths are based on 76cm barrels

HAND FINISHING

Once all the individual elements have been created the DT11 is assembled at the Beretta custom shop, known as Beretta Due. Here Beretta's most skilled gunmakers will ensure that everything fits together to produce a smooth opening gun, perfectly timed ejectors and sweet trigger pulls. This careful design, refined over 70 years of Olympic competition, has turned the DT11 into a winning machine.

50⁺ SPECIFICATION OPTIONS

Every shooting discipline and every top shooter, requires particular specification and shooting dynamics. This is why the DT11 is available in over 50 model specifications. Special order options mean that barrel weight can be specified and custom stocks fitted.

CUSTOMISATION

Customisation options are available to special order for all models in the DT11 range. These include specified barrel weight, engraved inscription on the barrels, ornately engraved top levers, an engraved oval (in silver or gold) and/or a Tru Oil stock finish.

It is possible to select your own stock blank, in standard grade or with an upgrade in wood quality, either through a UK Beretta DT11 stocking dealer or by visiting the Beretta factory in person. In addition, you can have your stock built to your exact dimensions with a matching forend in Round, Schnabel or Beavertail. All these options constitute a special order, for which there is a surcharge. As with all good things you will have to wait a little longer for fulfilment of special orders.

Microcore® is the innovative recoil pad developed by Beretta thanks to decades of experience gained on hunting and shooting ranges around the world. Soft, light and adaptable, the Microcore® recoil pad is made of open cell polyurethane and combines lightness and performance like no other. Microcore® is available in 13, 18, 23 and 28mm.

B-FAST

Beretta shotguns are renowned for their outstanding balance and optimal ergonomics. However, for shooters who need to adapt the gun to their swinging and shouldering, Beretta has developed a weight adjustment and application system.

FOR EVERY COMPETITION

*BEAUTY AND PERFORMANCE, IN BERETTA'S
BEST EVER COMPETITION SHOTGUN!*

DT11 SPORT

“

Richard Bunning

My DT11 is a straight off the shelf, standard left-hand stock with no alteration. I remember when I got it, I went out every day for a week just learning how it handled... then straight into competition the following week and I've never looked back!

I love the balance, the ease in which it moves to the targets is excellent and there's very little recoil.

My best win with it? Simple, being World English Sporting Champion.

”

DT11 SPORT ADJUSTABLE

Beretta's ingenious adjustable stock system allows the user to tailor their own comb height, comb angle and amount of cast. Easy to set up, rock solid once in position.

DT11 SPORT

The standard sporting version of the DT11 simply soaks up recoil allowing you to quickly acquire and demolish the second target. Its outstanding balance enables consistent and predictable handling, which is essential for breaking long-distance targets. The palm swell and Schnabel forend make the gun comfortable in the hands and ensure a positive contact. A round forend is also optional. Available in two barrel lengths; the 32" offers a longer sighting plane in comparison to the more traditional and slightly faster 30" version.

DT11 SPORT 31"

A recent introduction with specifications which set it apart from the regular DT11 Sport. An ideal model for devotees of the 30" barrel length looking to explore a longer barrel, but not keen on the full 32". This model also features a Steelium barrel profile and a beavertail forend. The stock has a slightly different drop; specifically a 50mm drop at the heel whilst maintaining the hugely popular 35mm comb drop.

Model/Description	Barrel length/ Chamber/S/Steel	Chokes (No. of chokes)	Approx. weight (kg.)	Left-hand	Rib width	Stock drop comb/heel (mm)	SRP (inc. VAT)
DT11 Sport	30", 32" - 3"/SS	O / C.H.P.E (5)	3.75, 3.9	●	10 x 8mm	35/56	£9,750
DT11L Sport Adj.	30", 32" - 3"/SS	O / C.H.P.E (5)	3.75, 3.9	●	10 x 8mm	-	£10,200
DT11 Sport 31" (Steelium Bore Profile)	31" - 3"/SS	O / C.H.P.E (5)	3.9	●	10 x 8mm	35/50	£9,750
DT11 Sport 31" Adj. (Steelium Bore Profile)	31" - 3"/SS	O / C.H.P.E (5)	3.9	●	10 x 8mm	-	£10,200

DT11 TRAP

THE N°1 CHOICE
OF CHAMPIONS

“

Lucy Hall

I instantly fell in love with my DT11 Trap the first time I used it! However, over the years my appreciation of the gun has grown; its handling characteristics are second to none. The drop out detractable trigger is my favourite feature; if any problems arise in competition you can instantly swap to the spare unit and keep shooting.

”

DT11 DTL ADJUSTABLE

When target speeds are slower, angles less extreme and missed target terminal a different trap gun is required. The DT11 DTL trap features multi chokes to allow faster opening patterns, a flat 10 x 10 rib and adjustable stock.

DT 11

DT11 TRAP ADJUSTABLE

Beretta's ingenious adjustable stock system allows the user to tailor their own comb height, comb angle and amount of cast. Easy to set up, rock solid once in position.

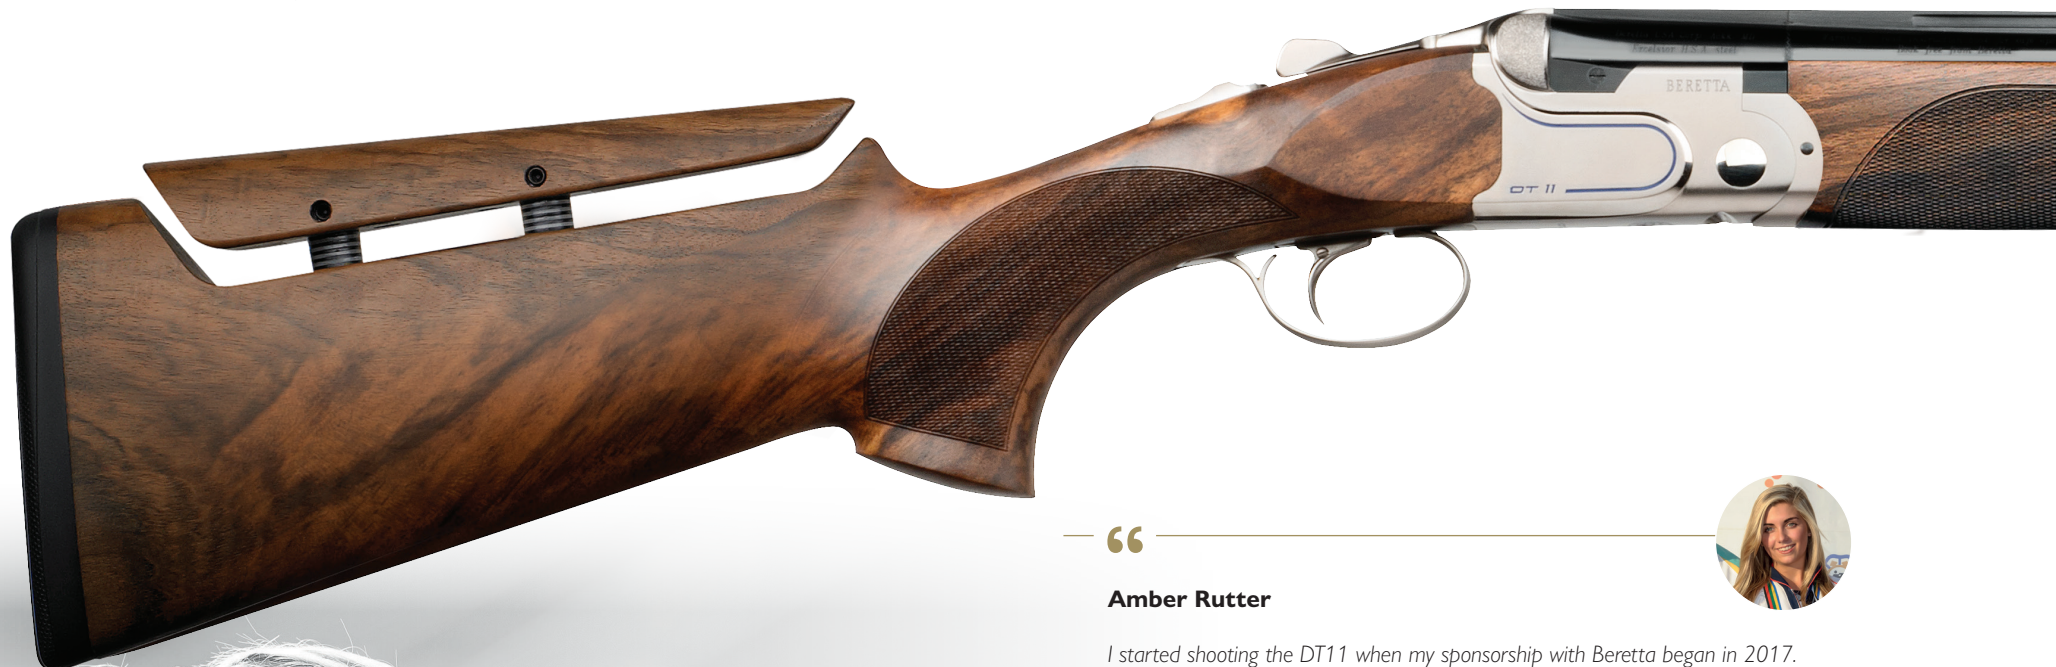

DT11 TRAP

Italy is the home of Olympic Trap, and they are very good at winning Olympic medals in this discipline. With such devotion to the discipline, it's fair to assume they are pretty demanding of their trap guns. The DT11 Trap has been refined and perfected over time, details such as stock dimension, barrel weights and rib configurations have all been specified by Beretta's pool of champion shooters and coaches.

Model/Description	Bore size	Barrel length / Chamber/S/Steel	Chokes (No. of chokes)	Approx. weight (kg.)	Left-hand	Rib width	Stock drop comb/heel (mm)	SRP (inc. VAT)
DT11 Trap	18.4	30" - 2.3"/4"	¾ & F	3.95	●	10 x 10mm	29/39	£9,450
DT11 Trap Adj.	18.4	30" - 2.3"/4"	¾ & F	3.95	●	10 x 10mm	-	£9,900
DT11 DTL Adj.	18.6	30" - 3"/SS	O / C.H.P.F (5)	3.95	●	10 x 10mm	-	£10,400
DT11 DTL Monte Carlo Adj.	18.6	31" - 3"/SS	O / C.H.P.F (5)	3.95	●	10 x 8mm tapered/stepped rib	-	£10,400

DT11 SKEET

“

Amber Rutter

I started shooting the DT11 when my sponsorship with Beretta began in 2017. Usually, it takes a little while to get used to a gun, but with the DT11 I took it straight to Lonato and shot 24 or 25 even, straight off, first time. Instantly, I thought, I love this gun! For me it's all just so natural.

My most memorable win with my DT11 was when I shot the world record in Delhi and won the Olympic quota place. It had been a hard time for me, coming back after Covid. But I remember it all just clicked. I was never worried, it felt almost effortless. That was a pretty special win.

”

DT 11

DT11 SKEET ADJUSTABLE

Beretta's ingenious adjustable stock system allows the user to tailor their own comb height, comb angle and amount of cast. Easy to set up, rock solid once in position.

DT11 SKEET

Olympic skeet targets are the most strictly specified of all the top disciplines. When conditions are good this often leads to very high scores, allowing very little margin for error. Trust in the gun is everything. Smooth handling, great balance and sharp trigger pulls are some of the characteristics that make the DT11 Skeet the gun of choice for 3 times gold medallist Vincent Hancock and many others.

Model/Description	Barrell length/ Chamber/S/Steel	Chokes (No. of chokes)	Approx. weight (kg.)	Left-hand	Rib width	Stock drop comb/heel (mm)	SRP (inc. VAT)
DT11 Skeet	28", 29" - 3"/SS	O / C.H.P.F. (5)	3.65,3.7	●	10 x 8mm	35/56	£9,750
DT11 Skeet Adj.	28", 29" - 3"/SS	O / C.H.P.F. (5)	3.65,3.7	●	10 x 8mm	-	£10,200

D11 L

The D11 L is designed to meet the requirements of the most serious competition shooter who is looking for an element of individuality and refinement. Additionally, their low recoil will make them fabulous high bird guns. The stock and fore-end are cut from superior quality walnut, perfectly complimented by the premium engraving; a perfect synthesis then, of performance and beauty.

A GUN WHICH WILL GUARANTEE A LIFETIME
OF USE AND PERFECT BALANCE.

DT11L SCROLL

DT11L SCROLL ADJUSTABLE

DT11L

DT11L SCROLL

The same feature rich competition gun, which is guaranteed to take your shooting to the next level. At the same time, a truly beautiful gun which offers that element of versatility. Beautiful, floral motif engraving is hand finished by master engravers. Whilst the selected walnut stock boasts a special, hand cut, deep diamond checkering which enhances the aesthetics and improves grip.

Model/Description	Barrel length / Chamber/S/Steel	Chokes (No. of chokes)	Approx. weight (kg).	Left-hand	Rib width	Stock drop comb/heel (mm)	SRP (inc. VAT)
DT11L Sport Scroll	30", 32" - 3"/SS	O / C.H.P.E (5)	3.8, 3.9	●	10 x 8mm	35/56	£14,000
DT11L Sport Scroll Adj.	30", 32" - 3"/SS	O / C.H.P.E (5)	3.9	●	10 x 8mm	-	£14,500
DT11L Trap Scroll	30" - 2.¾"	¾ & F	3.95	●	10 x 10mm	29/39	£13,550
DT11L Trap Scroll Adj.	30" - 2.¾"	¾ & F	3.95	●	10 x 10mm	-	£14,050

DT11L GAMESENCE

DT11L GAMESENCE ADJUSTABLE

DT11L

DT11L GAMESCENE

Furthering their pursuit of the perfect competition shotgun, Beretta has created this superlative gun. The action is embellished with handsome gamescenes depicting flushing pheasants on one side and ducks upon the other. A classic, traditional finish to a cutting-edge shotgun. Beretta have created a stunning gun which will perform exceptionally well, be that field or range.

Model/Description	Barrel length / Chamber/S/Steel	Chokes (No. of chokes)	Approx. weight (kg.)	Left-hand	Rib	Stock drop comb/heel (mm)	SRP (inc. VAT)
DT11L Sport Gamescene	30", 32" - 3"/SS	O / C.HPE (5)	3.8, 3.9	●	10 x 8mm	35/56	£14,000
DT11L Sport Gamescene Adj.	30", 32" - 3"/SS	O / C.HPE (5)	3.9	●	10 x 8mm	-	£14,500

DT 11 EELL

The DT11 EELL is elegantly adorned with exquisite scroll engraving upon the sideplates, making it the perfect choice for the discerning clay shooter who is looking for a touch of class. Similarly, the specification makes them perfectly suited for tackling high driven birds from a peg. The stock and forend are cut from superior quality walnut, providing perfect counterpoint to the flawless scroll engraving.

THIS JUST MIGHT BE YOUR GUN OF A LIFETIME.

DT11EELL SCROLL

DT11EELL SCROLL ADJUSTABLE

DT 11 EELL

DT11EELL SCROLL

Quite simply the ultimate DT11. Deep contrast, scroll engraving embellishes the elegant sideplates. With its sumptuous looks and incredible handling characteristics, you'll be astonished at the quality and performance of this truly beautiful shotgun.
